Allowable Subject Matter

1. This office action is in response to the amendment filed on 08/19/04.
2. Claims 4-16 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Applicant has amended the claims in accordance with the Ex parte Quayle action dated 08/06/24. Upon further consideration, claims 4-16 are allowed. Particularly, prior art of record (closest references, Fullerton – US 6,549,567 and Zorabedian et al. – US 6,526,071), taken individually or collectively, fails to fairly teach a method and apparatus for variable wavelength impulse transmission, as claimed, including “sending one-cycle electromagnetic impulse without carrier wave; wherein data is encoded in the transmission by choosing an appropriate wavelength for each of impulses according to a respective value of data being sent” in independent claim 1 or “the transmission using one-cycle electromagnetic impulses which are sent without carrier wave; wherein the transmitting device is capable to choose a wavelength for the impulses from among two or more different wavelengths” in independent claim 12; or “data is transmitted without carrier wave, using one-cycle electromagnetic impulses; wherein different impulse wavelength are allocated for different use” in independent claim 14 (claims 5-11, 13, 15-16 depend therefrom). Thus, claims 4-16 are found to be novel and unobvious over prior art of record.
